I have surveyed the above-named ship in accordance with the Rules for Damage

DAMAGE. Stated to have occurred whilst the vessel was entering Barry Docks on the 10th October 1965 at 19,04 hours and being due to high winds and currents causing the vessel to make contact with the quay wall on the port forward side.

FOUND Port side forward, second strake below sheer, third plate from forward and adjacent plates set in together with two frames.

No repairs carried out at this port.

Damage specially examined and shell plating being considered to remain efficient without repair until the next dry docking.

The items now surveyed are detailed on this report. All were found or placed in good condition unless otherwise stated. I recommend, therefore, that this ship remain as classed with/without fresh record of ~~dry-docking~~ survey. Subject to the port forward indent in second below sheer strake, third plate from forward being specially examined and dealt with as necessary at the next dry docking. Subject also to all other special conditions of class being dealt with as previously recommended.

OTHER ITEMS	BEAMS	DECK PLATES	FRAMES	SHIELD PLATES	MAJOR REPAIRS

(Where conditions of class are recommended to be retained, imposed, amended or deleted, particulars must be stated above and on the interim certificate.)
