

15.6.66

Dear Sir,

2.

S/S 'NUÑEZ DE BALBOA'

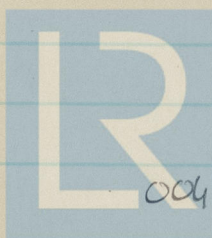

This is to inform you that in accordance with the records in your possession this vessel should renew the aft winch block, and carry out the annual boiler survey and hull survey before the 30th of the present month.

However, although we have the block ready for installation at this port, we have the vessel engaged ~~for~~^{on} a voyage which will last 3 months and in this connection, we would ^{be} pleased to carry out the Boiler survey and proceed to the fitting of the block at the end of the voyage in question.

For this reason, we would esteem it a favour if you were good enough to request in our name from your London Office an extension until the 15th October next to carry out this work, and we may add, that this job would be effected in Bilbao, at the Works of M^{rs} Diego Adad & Co. de Construcción Naval.

In the event of your requiring to see the block (damaged) carried by the winch before an extension is granted, we inform you that we calculate the vessel will be due at Cork (Ireland) about the 1st July, next, where she will remain discharging coal about 5 days.

Awaiting the favour of your reply
