

S.S. "ANDALUSIER"

With reference to the letter of the 12th instant from the Middlesbrough Surveyors enclosing one from the Builders, regarding the omission of the Downton pump in this vessel, it may be observed that the fitting of hand pumps and Downton pumps was dispensed with during the War as a War Emergency Measure, subject to the Owners being required to fit them if requested by the Committee to do so at a later date. No change has been made in this arrangement which therefore remains in force.

In the circumstances it is submitted that no further action need be taken in the present instance.
