

1047/1.

16th March, 1953.

Dear Sirs,

" Delfshaven "

With reference to your letter of 10th March we return herewith one copy of plan No. 6283/2 and No. 6283/4.

We have to inform you that the arrangements will be approved as shown and amended on the plan, provided the remaining requirements of the Rules for Pumping and Piping be complied with so far as they are applicable.

The plan of air pipe closing arrangement is noted and in order.

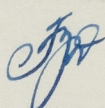

With regard to the fore peak suction, we have to add that a screw down valve, with control from deck should now be fitted on the collision bulkhead in the fore peak tank.

We should be glad if you would let us have one further copy of plan No. 6283/2 and plan No. 6283/4.

Yours faithfully,

Enclosures.

Howaldtswerke A.G.,
Hamburg.
