Lloyd's Register of Shipping.

High Close, Wokingham, Berks.

Dear Sir,

27th November, 1942.

With reference to Glasgow first entry report No. 66280 on the motorship "EMPIRE HIGHWAY", it is concluded the deep tank has been tested and that an echo-sounding device has been fitted.

I would also remark that the total heating surface of the oil and exhaust gas boiler, according to the plan, appears to be 2482 sq. ft.

I am, Dear Sir,
Yours faithfully,

The Secretary,
GLASGOW.

Clerk to the
Classification Committee.
