I forward the Freeboard Verification Form concerning the
ove-named vessel.

Practically all the work to complete the Classification
rvey has been finished. The fore-peak only has been tested,
e after-peak, the remaining tanks, watertight bulkheads, etc..
ve yet to be tested.

The boiler is now being surveyed and after completion the
se testing of the bulkheads and decks will be carried out and the
mping arrangements and electric installation will be tested.

I propose to issue a L.L.S.T. for a three-month period from
e date that the testing has been satisfactorily completed.

I trust that this will meet with your approval.
