14th December, 1951

Dear Sirs,

I am in receipt of your letter of 29th November with enclosures respecting the "DONGEDIJK" ex "DELFTDIJK", and with regard thereto, I have to say I shall be glad if you will confirm that the displacement on 22983 cubic metres is at 85% of the moulded depth ($T = 10.363$ m) and verify the height of Bridge tween decks and give the freeboard deck sheers above (or below) a line drawn parallel to the keel through the sheer line amidships.

In addition you should report the scantlings of the machinery casings within the bridge tween deck with means of closing any openings in it and give the closing appliances provided for the airpipes and details of the tunnel escape companionway in the poop tween deck.

At the same time, I shall be glad if you will forward the amended copies of the approved midship section and profile and decks.

Yours faithfully,

pro Secretary.

The Surveyors,
ROTTERDAM.
