

lengthen the ship 4 metres on the bow.  
fitting a new bow.

REPORT on the

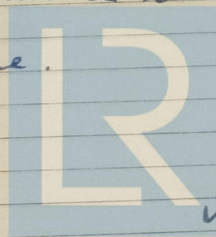

## Delftdijk

The summer moulded draught corresponding to minimum  
geometric freeboard with ravel lengthened by 4 metres  
forward & a block coefficient of .732 & assuming existing  
sheer curve forward extended, will be approx 30.69 feet  
i.e.  $3\frac{3}{4}$ " greater than present draught.

The Rotterdam Surveyors should be advised that  
if the alterations are proceeded with, a new CII  
& CII comp should be forwarded in due course

Copy of endorsement for "F" alone.
