

EXTRACT from Bmn. Cl.Ltr. 6.4.55.

6th April, 1955.

BREMEN

1188. "NEPTUNIA". As recommended. I shall be glad if you will clarify the capacities of the generator sets since in your letter of the 28th January last, the Diesel generators were stated to be 75 KW each and the turbo-generators 150 KW each. At the same time, I shall be glad to learn whether the recommendation in your hull report was dealt with during the vessel's stay at Bremerhaven on the 13/16th ultimo.
