

# T OF SURVEY FOR REPAIRS, &c., OF ENGINES AND BOILERS

(Received at London Office)

1188  
1188

No.

3 MAR 1955

Report 19. 2. 1955. When handed in at Local Office.

22. 2. 1955. Port of BREMEN.

3 MAR 1955

held at Bremenhaven.

Date. First Survey 20.12.55 Last Survey 16.2.1955.

(No. of Visits 12.)

|     | t, mine all the mountings of the Main Boilers? J. , and of the Donkey Boilers? ✓  |   |
|     | u, now been drawn and examined? NO. Has it a continuous liner? ✓ Is an approved oil retaining appliance fitted at the after end? ✓  |   |
|     | v, hanged? If so, state reasons. Has the shaft now fitted been previously used? ✓ Has it a continuous liner? ✓  |   |
|     | w, mining appliance fitted at the after end? ✓ State date of examination of Screw Shaft. State the wear down in the   |   |
|     | x, Is electric light and/or power fitted? J. If so, did the Surveyor examine the generators, motors, switchgear cables and fuses? J.  |   |
|     | y, stance of the generators, circuits and apparatus been tested and found to be not less than 100,000 ohms? J.  |   |
|     | z, referred to by numbers, should be counted from forward. Auxiliary machinery should be referred to by position in Machinery Space.  |   |

Complete, state what arrangements have been made for its completion and what remains to be done. Complete.

- Vessel placed in dry dock examined propellers and outside fastenings, sea valves, prop. screw shaft cone only and after end of stern tube and fastenings. Opened up Port main engine cylinders, pistons, rods, covers, valves and valve chest, and bottom end bearings, crankshaft, thrust shaft and intermediate shafts and bearings, bilge and sanitary pumps, P. vs. main condenser, Port air condenser pump, Port main pump, electric driven feed pump and gear drive, ballast, general service, starboard bilge, emergency transfer, main and auxiliary bush O.P. pumps, pumping arrangements, O.P. heater and heating arrangements, electric driven forced draught fan, gear + motor, evaporator, turbo generator turbines (casing lifted), inboard diesel generator engine, emergency generator sets. Fair/aux. circulating pump, electrical installation, steering gear engine, winches. Examined all boilers in their entirety together with their mountings, doors and fastenings. Valves adjusted under steam to 213 lbs/2. Boiler foul off pressure lines and insulation under working conditions, fire fighting installations and equipment, clean + co<sub>2</sub>, (continued)

## tions, Opinion, and Recommendation:

What alteration, if any, is suggested to be made in the existing classification of the vessel's machinery in the Register Book, consequent upon this survey, and on required to be made in the records of the vessel's machinery, boilers, working pressures, &c.; thus, for example, BS 9.11, B&MS 9.11, #LMC 9.11 or 1b., FD, &c.)

This vessel so far as seen is in good order and is eligible in my opinion as closed in the Register Book with port record of 28.2.55.

BREMEN.

Continuation of Report No. 1188 dated 19. 2. 55. on the

T.S. NEPTUNIA:

examined and tested, extended spindles for disk control to O.F. bunker, steam and  
bulge valves examined and tested. Diesel gen. engine compressor and after SA receiver examined.

Repairs:- Duct propeller removed ashore and refitted satisfactorily. Propeller reconditioned and stamped "LLOYDS ROTT. NO. 10088, 2. 2. 55 H.A.M."

About 20 tubes in P & S. condensers each renewed and condensers tested  
and made tight.

Port main circulating pump spindle and clearance rings removed (wear).

Main O.F. boiler pressure pump spindle renewed and bearings relubricated (wear).

P & S. main engine and Port and Starb. intermediate shaft aftmost bearing  
bolting - down bolts overhauled and hardened up.

Bulge, ballast and O.F. tank valves and lines overhauled and all extended  
spindles made workable.

Electric - driven T.D. boiler fan gearing overhauled, ball bearing and gear  
wheels renewed (W.H.).

Starb. fire/sanitary pump (elect. dr.) overhauled in shop. Clearance rings renewed  
spindle stemmed & glands rebushed.

Diesel generator engine starting air receivers, fwd. and aft, fitted in accordance  
with Rule requirements with drain valve at bottom of receivers. (Previously drained by pipe led  
from top of receiver internally).

Boilers:- Port fwd. boiler - a few C.C. side stays renewed (cracked).

Port aft boiler: Center furnace mouth seam & rivets recaulked. One main stay  
re-jointed in end plate. All plain and flat stay nuts in center base removed. (leaking  
and wasted).

Starb. aft boiler:- A few C.C. side stays renewed (cracked). Inboard furnace  
mouth seam & rivets recaulked.

Center aft boiler:- One stay bolt renewed (wasted) and a few plates re-  
expanded. A few C.C. wrapper plate stays renewed (cracked). One main stay re-  
joined in end plate.

The boilers tested hydraulically as required on completion and made tight  
and satisfactory. Minor renewals and repairs effected to boiler mountings.

CO<sub>2</sub> installation placed in good order.

Electrical Installation.

3 - turbo generators 200 kw. - 600 kw. (220V.)

2 - Diesel generators 150 kw. - 300 kw.

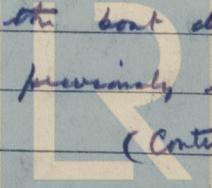

1 - Emergency generator 40.3 kw - 40.3 kw.

940.3 kw.

The insulation resistances of the electrical installations,  
generators and motors tested. The motors cleaned, overhauled and re-varnished  
as found necessary. Minor repairs and renewals made to the electric light wiring  
and fittings. The generators and governing examined and tested on completion  
of repairs and found satisfactory.

The steering - gear emergency electrical batteries were renewed  
and installed in the panic - battery - room on the boat deck. ©2020  
satisfactorily connected to the steering - gear (Batteries previously installed  
in steering - feet).

(Continued)

BREMEN.

Continuation of Report No. 1188 dated 19. 2. 55 on the

T.S.S. "NEPTUNIA"

220V.

An installation of panic button (65. amperes) together with automatic switches was installed in a room on the boat-deck, the room arranged with efficient mechanical ventilation and with warning twice outside the room regarding naked lights, the switch gear installed in the emergency generator room. The installation tested on completion and found satisfactory. ✓
