Enclosures

12th September, 1952.

Classn(S)  
EJB

Dear Sirs,

Steamer "VRISSI" ex "OILSTREAM"

With reference to the call made at this Office yesterday by Mr. Lentakis, I have to inform you that the case of this ship has received the consideration of the Committee to-day in connection with the survey recently held at Amsterdam.

Instructions have been given for the class of this ship to be amended to BS "Tanker - Oils F.P. below 150°F" and notations of S.S. Ams.-4,52 and MBS 4,52 have been assigned together with records of Annual Survey and Boiler Survey 4,52, and Docking Survey 3,52.

I have pleasure in enclosing Classification Certificates on hull and machinery herewith, but I think it well to point out that while it is noted that the replacement steam cylinder for the main circulating pump engine is on board, it is considered that the existing cylinder should be examined or renewed before the end of the present month, and the class has been continued subject to this being done, it being concluded that you will make the necessary arrangements accordingly.

Yours faithfully,

Clerk to the  
Classification Committee.
