

M.S. "PLASSY"F.E. Refrig. Electrical Equipment.

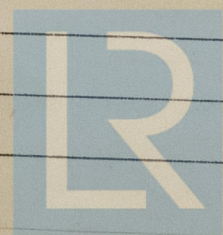

A reconditioned 32 K.W. diesel driven generator set, with the necessary circuit breaker panel on the main switchboard complete with equaliser circuits to work in conjunction with the existing generators.

Two 26 H.P. motor driven compressors, and two 1 H.P. circulating pumps were fitted.

On completion the generators were tested for compounding and paralling and the whole equipment under working conditions with satisfactory results.
