

COPY

28th January, 1947.

The Secretary,
LONDON.

Dear Sir,

M.V. "PATELLA" Bel. Rpt. No.14303

In reply to the classing letter of the 24th instant, we note that the particulars of the clause relating to torsional vibration characteristics for Builders signature should be adhered to.

It is also noted that the M.N. is 714 and not 502 as reported. An account for £21. 4. 0 has been sent to the Builders, Messrs Harland & Wolff, Ltd., Belfast, and we would be glad if you would amend the machinery report accordingly. The failure to apply the new Rules is regretted, also the inconvenience caused thereby.

We regret that the reference to gastight fittings is ambiguous. We shall be glad if you will amend the statement to read - "Flameproof fittings where necessary".

We are, Dear Sir,
Yours faithfully,
The Surveyors,

per
(sgnd.) E. GRIEVES.
