

"PORT WYNDHAM"

SPS discussed with Mr. Stannard. He was surprised to learn that there are pipes over 3" bore but raised no objection to doing the survey. Mr. Cook is in no doubt that there are pipes over 3" bore.

Mr. Stannard will see if he has a plan of S.P. arrangement showing the sizes and if such plan indicates no pipes requiring SPS he will write on receipt of our letter.

The ship will be docking in London towards the end of April when the question could be resolved on board.
