

8- OCT 1963

Ship's name

"SPABECK"

Port

PLY

No.

8999.

Last survey date 23/8/63.

Class is subject to:-

Working faces of the screwshaft oil gland being machined at the next dry docking, by 8.63.

Docking. Weardown 0.04". Oil gland stated to have been working satisfactorily, now examined under pressure and found tight. Owners request that machining of working faces be deferred until next screwshaft survey (due 8/64).

MBS due 7.63. Now held.

Machinery reported as generally examined for postponement of ES (due 8.63) but, it is considered that the items now examined can be accepted as commencement of ES.

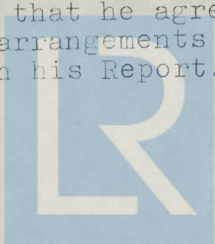

IT IS SUBMITTED that this vessel is eligible for the record MBS 8.63 now and WILL BE eligible for the record ES (with date) on completion, with subject item amended to working faces of oil gland to be machined at Screwshaft Survey (due 8/64).

7.10.63.

NOTE.

Advise Surveyor that the machinery items now examined including megger test are being credited towards the ES. X

It is concluded that he agrees with this, also that the bilge pumping arrangements are in order as this is not mentioned in his Report. X
