

"CAPE ST. DAVID"

Before this case receives consideration, SUBMITTED Rotterdam Surveyors be informed it is noted the two main generator sets installed are of 40 KW capacity; instead of 30 KW as per approved plan.

In the circumstances, they should be asked to confirm whether:-

- (1) The generator cables have been increased ~~to~~ⁱⁿ size, i.e. to 120 mm² or equivalent.
- (2) Circuit breakers have been substituted for fuses in the main cables to change-over switches.
- (3) Ammeter scale amended from 400 amp. to 600 amp.
