QUESTION

ANSWER

With reference to your Report No.8241, I shall be glad to learn what early definite arrangements are proposed to be made for the auxiliary condenser inlet water box to be renewed.

At the same time I would refer to my letter of the 26th January, and shall also be glad to learn how this case stands as regards the equipment.

Date:— 15th JULY 1960

Owners state vessel is at present laid up in Lisbon pending a decision regarding her future.

The auxiliary condenser inlet water box has not yet been renewed, but an anchor and 15 fathoms of chain cable are at present in the company's store and will be placed on board if required when a decision has been made regarding the vessel's movements.
