Lloyd's Register of Shipping,

7th Fenchurch Street, E.C.3.

GENOA.

16969. RMC As recommended.

16926 "SANTA MAFALDA" This vessel has to-day been classed + 100A1 "Motor Trawler", with notations as recommended.

It is concluded the thicknesses of the upper deck beams amidships and the forecastle deck beams are 9.5m.m. and 10 mm. respectively and that the breadth of the upper deck stringer plate is 1270 mm. as approved, but you should state if this is so.

The lengths of the poop and forecastle, as reported, do not agree with the lengths measured in accordance with Circular 1551 on the outboard profile dated 17.9.48 and I shall be glad if you will confirm this.

I shall be glad to know whether the Owners' consent in writing has been obtained covering acceptance of shunt-wound generators, as required in the Secretary's letter of 17.2.48.

Makers test Certificates covering electric motors for windlass and warping winch do not appear to have been received and I shall be glad if you will arrange for these to be forwarded as soon as possible.

Finally I have to request you will be good enough to let me know on what basis the fees for the electrical survey were assessed, as those entered on the electrical report do not appear to approach the scale charged.
