

MR. EALES
Reports.

Reference telephone conversation this morning
respecting CHEMBARGE NO.4.

This ship stands in the Register Book at present
as a non-propelled ship with no indication in Col.6
as to her service.

According to Lloyd's List she has been converted
to an acid tank barge. No information regarding any
alterations would appear to have been received in this
department.

The ship is to be sunk in deep water as the acid
tanks are apparently leaking and the ship is dangerous.

Can enquiries be made regarding any alteration
to the existing entry in the Register Book.
