

m.t. "GEORIOS MANALOKIS"
R.B.No. 12350.

IT IS SUBMITTED the Piraeus Surveyors be informed that the electrical plans forwarded with Messrs. Deutschewerft's letter of the 9th July, 1959, have been examined.

In order that full consideration may be given to the arrangements, the Surveyors should be requested to forward the following information:

- (1) The type of cables used throughout the installation.
- (2) The make and type of fuses used.

Further, it appears that electrical equipment other than flameproof lighting fittings is installed in the pump-room and further details of this equipment should be forwarded for consideration.

Plans showing the lighting arrangements on the main deck, in the midships 'tween-deck space and the pumproom, and indicating the type of fittings used, should also be forwarded. With regard to the pump-room lighting it should be noted that the arrangements are to comply with M.1533 or M.1534 (previously M.1535 and M.1536).
