action taken or recommended should be described fully under "defects & repairs". When any part has been subjected to pressure test this should be stated.

I have surveyed the above-named ship in accordance with the Rules for GENERAL EXAMINATION FOR POSTPONEMENT OF SPECIAL SURVEY (C) due 2,66.

CONDITION OF CLASS (S.R.L.No.246).

Local corrosion on sternframe (s.s.).
 Shell plate No.7 from aft 3rd below sheer (s.s.).
 Indented shell plate No.10 in 4th below sheer (p.s.) etc.
 Set in shell plates G.8, H.7 (s.s. from a).

The above items not examined at this time - vessel afloat.

15 fathoms chain cable not supplied at this time.

S.R.L.APPENDIX No.17:- Items not examined at this time.

GENERAL EXAMINATION. The General Examination having been satisfactorily completed and the vessel found in efficient condition the Owners request for postponement of Special Survey (due 2,66) until about 7,66 in my opinion merits favourable consideration.

The items now surveyed are detailed on this report. All were found or placed in good condition unless otherwise stated. I recommend, therefore, that this ship remain as classed ~~with~~ without fresh record of dry docking Subject to local corrosion on sternframe (s.s.); shell plate No.7 from aft in 3rd below sheer (s.s.); indented shell plate No.10 in 4th below sheer (p.s.) etc; set in shell plates G.8, H.7 (s.s. from a) being specially examined and dealt with as necessary at the next drydocking and to 15 fms of chain cable being supplied at earliest opportunity - all as previously recommended.

(Where conditions of class are recommended to be retained, imposed, amended or deleted, particulars must be stated above and on the interim certificate.)
