We have surveyed the above ship in accordance with the Rules for Pressure testing of amidship deep tank.

The items now surveyed are detailed on this report. All were found or placed in good condition unless otherwise stated. At request of Owner's representative attended on board for pressure test of amidship deep tank, following repairs which has been made without survey. Deep tank top port side and starboard side of forward bulkhead plating found to be wasted and leaking, as time and ship's commitments did not permit full survey or further pressure test of tank being made, cement boxes were fitted to the two wasted areas as above and it is recommended that the class be continued subject to the deep tank being specially examined, pressure tested and dealt with as found necessary on ship's arrival at London to which port she is now proceeding direct.

(Explanatory letter and copy of Interim Certificate forwarded to London Outdoor Surveyors for information 19.6.65.)

We recommend that this ship remain as classed ~~xxx~~ without fresh record of dry docking subject to deep tank being specially examined, pressure tested and dealt with as found necessary on ships arrival at London to which port she is now proceeding direct, also subject to any other conditions at present attached to the ship's class being dealt with as previously recommended.

(Where conditions of class are recommended to be retained, imposed, amended or deleted, particulars must be stated above and on the interim certificate.)
