UW BRIEF VAN:

ONS KENMERK:

VLISSINGEN,

September 17<sup>th</sup> 1952

ONDERWERP:

BIJVOEGSELS, TERUG  
NIEUW

The undersigned, chief-engineer of the Rijkswaterstaat in the district of Flushing, hereby certifies

that the finnish ss ARIANA (Rederibolaget Re-Be, Helsingfors), which ran aground in the Westerscheldt (in the eastern outflow of the "Everingen") on 8.8.1952 has been cracked very seriously on two places a very short time after the accident,

that salvage of the ship in its entirety or in some big (afterwards to rejoining) parts, because of the presence of the cargo of iron-ore too, was not possible,

that for this reason the ship had to be given up for total lost.

The chief-engineer

Ir. A. Wiebes.
