C.  
DNS/DET

Dear Sirs,

## CLASSING LETTER

13980 "BENIEL". As recommended.

According to the records in this Office the auxiliary engines are positioned aft outboard (No.1), aft inboard (No.2) and forward (No.3), all on the port side, and you should confirm the position of the auxiliary engine examined at this time.

13939 "KAVO MATAPAS". As recommended.

I have to inform you that in this and future similar cases you should report the alterations for increase in draught on the Rpt.8, which should be a complete document in itself, as it is not sufficient to refer to the Rpt. C.11 (contd).

Prior to your survey, the machinery class was subject to the propeller and fastenings being specially examined at the next drydocking and to the port main boiler being re-examined and repaired as necessary on arrival at Bilbao, and an amended Interim Certificate should be issued recommending the deletion of these items.

I acknowledge receipt of your letter, with enclosure, dated the 6th instant, the contents of which have been noted.

Yours faithfully,

The Surveyors  
BILBAO pro Clerk to the  
Classification Committee
