Dear Sirs,

Steamer "MOUNT OLYMPUS"

I duly received your letter of the 15th July, and have to inform you that the Society has no requirements regarding the composition of white metal for bearings.

It is suggested, however, that you might approach well known manufacturers of such material and possible some reputable firm of Engine Makers for advice on the compositions which they regard as suitable for the ~~exo~~centric straps of reciprocating steam engines.

Yours faithfully,

Deputy Clerk to the
Classification Committee.
