fcs. 100.-

S.A. fee -

I have surveyed the above ship in accordance with the Rules for reported grounding.

The items now surveyed are detailed on this report. All were found or placed in good condition unless otherwise stated. Attended on board at the request of the Master who stated that the ship had grounded whilst manoeuvring in the river at Bangkok on the 20 March 1966.

It was further stated that the ship was loaded at the time of the incident, mean draught being given as 25'-0", had grounded softly at 15:06 hours, heeled slightly to starboard and was re-floated at 15:12 hours with the assistance of the tug and main engine manoeuvres.

Steering gear, main and essential auxiliaries, it was stated, had operated satisfactorily subsequent to re-floating.

Records of tank soundings gave no indication of leakage.

In view of the reported grounding it is submitted that class be maintained without fresh record of dry docking, subject to the ship being specially examined at next dry docking for possible grounding damage.

An appropriate entry to be made in the Conditions of Class List.

P.T.O.

I recommend that this ship remain as classed ~~with~~/without fresh record of dry docking, subject to ship being specially examined at next dry docking (grounding); subject also to conditions currently attached to the ship's class being dealt with as previously recommended.

(Where conditions of class are recommended to be retained, imposed, amended or deleted, particulars must be stated above and on the interim certificate.)
