

**COPY**

6th August, 1947.

KINGSTON.

CAYMANIA. I shall be glad to receive a reply to the enquiries made in my letters of the 4th September 1946 and 8th May last, regarding equipment and cargo battens. For your information I think it well to state that the vessel was under survey at Jacksonville, Florida in March 1947, and that records of Docking survey and examination of screwshafts, with date of 3,47, have been assigned. To complete the LMC survey, the port feed pump, pumping arrangements, oil fuel burning arrangement, and steam pipes require to be examined.
