

"BRIGIT MAERSK"

IT IS SUBMITTED the Owners be informed that the machinery of this vessel is not such as was contemplated when the proposal to include steam engine installations in the Continuous Survey scheme similar to that in force in the case of motorships.

It is considered that the survey of the machinery of this vessel should present no difficulties to the Owners, as the survey can be spread over a period of 12 months around the date of the Special Survey on the hull of the vessel.
