Lloyd's Register of Shipping,

71, Fenchurch Street, E.C. 3.

20th March, 1931.

Dear Sirs,

E. With reference to Rotterdam Report No. 20158 on the M.V. "MIJDRECHT", it is concluded that the thicknesses of the combustion chamber plating and front end plate and the nutting of the screw stays of the large donkey boiler are as approved, and that the safety valves of the waste heat donkey boiler were adjusted to 10 kgs. per sq.cm., but I shall be glad if you will confirm these conclusions.

I am, Dear Sirs,

Yours faithfully,

Secretary.

The Surveyors,

ROTTERDAM.
