

Empire Aldgate

Apr 1866

Mr Watson

I beg to draw your attention to the  
attached dynamo test sheets which show a flash  
test of 1500. volts. Some time ago I referred a  
similar case but cannot recall the vessel I do  
know that the certificates were similarly underlined  
as red as these which I now forward. Or which  
were approved. It may be your department has  
kept a record of the previous case.
