"EMPIRE DOVE"

Mr. Lyndsey again telephoned stressing the Ministry's desire to have the Classification Certificates as soon as possible.

It was explained to him that the matter had been taken up with the Hamburg Surveyors who cabled on the 15th instant that their report was being expedited.

Mr. Lyndsey stated that the vessel was expected to be at Leith until Thursday next and suggested that opportunity might well be taken for one of the Surveyors at that port to visit the ship in order to inspect her from an academic point of view, to enable an impression to be formed of the work carried out in Germany.

It was arranged with Mr. Lyndsey that immediately there was anything further to report he or Mr. Thomas would be telephoned at Whitehall 1537.
