

M.V. "HERMES" . .

Mr. Clinch of the Ministry, (Abbey 7711 Ext. 2560), has telephoned stating that he is anxious that there shall be no delay in the issue of Classification Certificates in this connection. He understands that the vessel is likely to be completed at the end of this month, and would therefore appreciate a letter being addressed to the Hamburg Surveyors asking them to expedite their report, which should have immediate attention at this Office to permit of Committee consideration and the issue of Classification Certificates without unnecessary delay.

It was arranged with Mr. Clinch that the Hamburg Surveyors should be instructed accordingly and asked to issue interim certificates pending the issue of official certificates to bridge the gap until the latter documents are issued.
