

"W.D. ATLAS"

IT IS SUBMITTED the Owners be informed that the Lisbon Surveyors report that during a recent survey for damage, alterations to the rudder were carried out at the same time at the Owners request. The area of the rudder blade was increased to make the vessel more responsive to the helm.

The rudder plan, showing the increased blade area, has now been examined in this office and can be approved provided the ship's speed does not exceed 6 knots.
