

Chief Ship Surveyor H. B. 14 Received from Chief Ship Surveyor MO
 S NAME AK SS Sea ex Sorrento Rpt. MO No. 9393
26034
 Remarks of the Chief Ship Surveyor are desired on this case for the consideration of the Classing Committee.

("The endorsement to contain a succinct summary of any repairs that have been required and to show the cause or causes of such repairs, and also to bring out clearly any exceptional features in connection with the case, so that the Classing Committee may have all the salient points presented in the endorsement."—Extract from Sub-Committee's Report, 24/5/92.)

of Survey First Int

This vessel was built by Messrs. Frannes Mek Verksted in 1906, and is classed with the Norske Veritas.

Sketches of the midship section and profile were recently forwarded to this Office, and a request was also received from the Owners for the vessel to be classed in this Society's Register.

The scantlings and arrangements were ~~examined~~ compared with the requirements of the Rules and found to be such as could be recommended to the Committee for approval for the class 100A, "Awning Deck with freeboard".

A report has now been received from the Grimsby Surveyors from which it appears that the scantlings of the vessel have been verified and the requirements of Section 48 of the Rules complied with.

A report has also been received from the Sunderland Surveyors, from which it appears the equipment of anchors, cables, hawsers and warps, etc., is in order.

It is submitted for the favourable consideration of the Committee that the vessel appears worthy to be classed 100A1 "Awning Deck with freeboard". The summer freeboard of 4 feet 3 ins. from centre of disc to top of statutory deck line at awning deck, now marked on the vessel's sides, to be inserted in

the classification certificate and recorded in the Register Book,
and further, the remaining freeboards as shewn on the accompanying
verification form to be inserted in the classification certificate,
and a record of survey 3,14 and notation of s.s. No. 2-14 should
be assigned.

17. 3. 14 .

The Grimsby Surveyors should be requested to
state whether the inner surface of the bottom plating is covered
with cement or bitumastic, as this is not clear from the report.
