

to the Log St. Hilary

is submitted the Surveyor should be
noted that in previous vessels of the "Reame Type"
the moulded depth at middle of length is reported
as 12" and a drop in sheer of 2 ins. abaft the
middle of the length.

It should be requested to state whether in
this case the moulded depth of 16 ft. given on the
plan is measured at middle of length or
at lowest point, also if the sheers furnished
with relation to the depth at middle of
length or at lowest point of sheer if the sheer
abaft amidships.
