

Rpt. 13.

No. 15283

REPORT ON ELECTRICAL EQUIPMENT.

(OTHER THAN FOR THE PROPULSION OF THE VESSEL)

Received at London Office

2 NOV 1951

Date of writing Report 26 SEPT 1951 When handed in at Local Office 2 Nov 1951 Port of BELFAST

No. in Survey held at BELFAST Date, First Survey 20 May 1951 Last Survey 2 Nov 1951
(No. of Visits) 35Reg. Book. 24076 on the "RHODESIA CASTLE" Tons { Gross 17041
Built at BELFAST By whom built MESSRS. HARLAND & WOLFF LTD. Yard No. 143 When built 1951
Owners UNION CASTLE CO. Port belonging to LONDON

Installation fitted by MESSRS. HARLAND & WOLFF LTD. When fitted 1951

Is vessel equipped for carrying Petroleum in bulk NO Is vessel equipped with D.F. YES E.S.D. YES Gy.C. YES Sub.Sig. NO Radar. YES

Plans, have they been submitted and approved YES System of Distribution TWO WIRE Voltage of Lighting 220

Heating 220 Power 220 D.C. or A.C., Lighting D.C. Power D.C. If A.C. state frequency -

Prime Movers, has the governing been found as per Rule when full load is thrown on and off YES Are turbine emergency governors fitted with a trip switch YES Generators, are they compound wound YES, and level compounded under working conditions YES

Are the generators arranged to run in parallel YES Is the compound winding connected to the negative or positive pole NEGATIVE

Have machines 100 kw. and over been inspected by the Surveyors during manufacture and testing YES Have certificates of test for machines under 100 kw. been supplied and the results found as per Rule YES Position of Generators IN ENGINE ROOM

is the ventilation in way of generators satisfactory YES are they clear of inflammable material and protected from mechanical injury and damage from water, steam and oil YES Switchboards, where are main switchboards placed NEAR GENERATORS

are they in accessible positions, free from inflammable gases and acid fumes and protected from mechanical injury and damage from water, steam and oil YES what insulation is used for the panels SINDANYO, if of synthetic insulating material is it an Approved Type YES, if of semi-insulating material (slate or marble) are all conducting parts insulated therefrom as per Rule - Is the construction as per Rule, including locking of screws and nuts YES Description of Main Switchgear for each generator and arrangement of equaliser switches T.P. ELECTRICALLY OPERATED. CIRCUIT BREAKERS FITTED WITH O.L & R.C. TRIPS

and the switch and fuse gear (or circuit breakers) for each outgoing circuit D.P. CIRCUIT BREAKER OR D.P. SWITCH & FUSES

Are compartments containing switchboards composed of fire-resisting material or lined as per Rule YES Instruments on main switchboard 5 ammeters 2 voltmeters - synchronising devices. For compound machines in parallel are the ammeters and reverse current protection devices connected on the pole opposite to the equaliser connection YES Earth Testing, state means provided LAMPS Preference Tripping, state if provided YES, and tested YES

Switches, Circuit Breakers and Fuses, are they as per Rule YES, are the fuses an Approved Type YES make of fuses SIEMENS "Z", are all fuses labelled YES If circuit breakers are provided for the generators, at what overload do they operate 25% OVERLOAD CURRENT, and at what current do the reverse current protective devices operate 15% FULL LOAD CURRENT

Cables, are they insulated and protected as per Rule YES, if otherwise than as per Rule are they of an Approved Type YES, state maximum fall of pressure between bus bars and any point under maximum load 6.1 volts. Are all paper insulated and varnished cambric insulated cables sealed at the ends -

Are all the cable runs in accessible positions not exposed to drip or accumulation of water or oil, high temperatures or risk of mechanical damage YES, are any cables laid under machines or floorplates YES, if so, are they adequately protected YES State type of cables (if in conduit this should also be stated) in machinery spaces H.R., galleys H.R.

and laundries H.R. State how the cables are supported or protected CLIPPED TO TRAY, STEELWORK OR WOODWORK

Are all lead sheaths, armouring and conduits effectually bonded and earthed YES Are all cables passing through decks and watertight bulkheads provided with deck tubes or watertight glands YES, where unarmoured cables pass through beams, etc., are the holes effectively bushed YES Refrigerated chambers, are the cables and fittings as per Rule YES

Have refrigeration fan motors been constructed under survey NO and test certificates supplied

Are the motors accessible for maintenance at all times YES

© 2020

Lloyd's Register Foundation

005353-005357-0077

Alternative Lighting, are the groups of lights in the engine and boiler rooms arranged as per Rule. YES Emergency Supply, state position IN SPECIAL COMPARTMENT. AFT

Navigation Lamps, are they separately wired. YES controlled by separate double pole switches and fuses. YES Are the switches and fuses in a position accessible only to the officers on watch. YES Is an automatic indicator fitted. YES Is an alternative supply provided. YES

Secondary Batteries, are they constructed, fitted and adequately ventilated as per Rule. YES state battery capacity in ampere hours 160 Where required to do so does it comply with 1948 International Convention. YES

Lighting, is fluorescent lighting fitted. NO If so, state nominal lamp voltage. — and compartments where lamps are fitted. —

Fittings, are all fittings on weather decks, in stokeholds and engine rooms and wherever exposed to drip or condensed moisture, weatherproof. YES

Searchlights, No. of WIRING ONLY whether fixed or portable. — are they of the carbon arc or of the filament type. —

Heating and Cooking, is the general construction as per Rule. YES are the frames effectually earthed. YES are heaters in the accommodation of the convection type. YES Motors, are all motors constructed and installed as per Rule and placed in well-ventilated compartments in which inflammable gases cannot accumulate and protected from damage from water, steam and oil. YES

Are motors coupled to oil fuel transfer and pressure pumps capable of being stopped from a position accessible in the event of fire in the pump compartment. YES Have motors of 100 BHP and over been inspected by the Surveyors during manufacture and testing. YES

Have certificates of test for motors under 100 BHP intended for essential sea services been supplied and the results found as per Rule. YES

Lightning Conductors, where required are they fitted as per Rule. —

Ships carrying Oil having a Flash Point of less than 150° F. Have all the special requirements of the Rules for such ships been complied with. — are all fuses of an Approved Cartridge Type. — make of fuse. — Are the fittings for pump rooms, 'tween deck spaces, etc., in accordance with the special requirements for such ships. — Are all cables lead covered as per Rule. —

E.S.D., if fitted state maker. MARCONI location of transmitter and receiver. FRAME F57 TO 58 P. & S.

Spare Gear, if the vessel is for open sea service have spares been provided as per Rule and suitably stored in dry situations. YES

Insulation Tests, has the insulation resistance of all circuits and apparatus been tested and found satisfactory. YES

I Continuation of Report No. 15283 dated 9.11.51

on the

The Electrical Equipment is installed in accordance with the approved plans and the requirements of the Rules.
All Insulated Conductors are guaranteed to have been tested at the maker's works as specified in the Rules.
The foregoing is a correct description.

Date Oct. 20th 1951

COMPASSES.

Have the compasses been adjusted under working conditions.

Baider's Signature.

Date

Have the foregoing descriptions and schedules been verified and found correct Yes.

Is this installation a duplicate of a previous case No. If so, state name of vessel —

Plans. Are approved plans forwarded herewith No. If not, state date of approval 25-1-51.

Certificates. Are certificates of test for motors engaged on essential sea services and generators forwarded herewith Yes.

General Remarks. (State quality of workmanship and materials, opinions as to class, etc.) The electrical equipment of this vessel has been fitted on board under special survey, tested under full working conditions and found satisfactory. Materials and workmanship are good.

Noted ADMU 27-11-51

(The Surveyors are requested not to write on or below the space for Committee's Minute.)

Total Capacity of Generators 2925 Kilowatts.

The amount of Fee £ 205 : 2/6: When applied for,
1/5 BELFAST £ 164 : 2/0 9.11. 1951
