Enclosures.

20th May, 1948.

Dear Sir,

I enclose for your information the deferred reports and attached correspondence on the Steamer "TRESUS" ex "LAUREL HILL", and would draw your attention to the letter and enclosure recently received from the Ministry of Transport.

With regard thereto I shall be glad if the Surveyors will ascertain the nature of the defects stated to have been found in the distant reading water gauge and the feed water regulator. In this connection I may say that it will be extremely beneficial if full details of the probable cause and remedies can be furnished.

Yours faithfully,

Clerk to the
Classification Committee.

The Secretary,
LIVERPOOL.
