

No. 126380

## REPORT ON ELECTRIC PROPELLING MACHINERY.

Date of writing Report	16.12.1947	When handed in at Local Office	19	Port of	Received at London Office	17.1.1948
No. in Survey held at	Birkenhead	Date, First Survey	19	Last Survey	No. of Visits	19
Reg. Book						
37910	Single on Twin Triple Quadruple	Screw vessel	"TRESUS" ex "LAUREL HILL"		Tons	Gross 10699 Net 6317
Built at	Portland Or.	By whom built	Kaiser Co. Inc.	Yard No.	When built	1944
Electrical Machines made at	Schenectady	By whom made	General Electric Co.	Generator Nos.	5727844	When made 1944
Shaft Horse Power at Full Power	6000/6600	Motor Nos.	5690833	Total Capacity of Generators	4925/6400	kilowatts
Machinery Numeral as per Rule	1058	Owners	Anglo-Saxon Petroleum Co. Ltd	Port belonging to	London	
Trade for which Vessel is intended	carrying petroleum in bulk					

PLANS.— Have plans of the Machines, Control Gear, Cables and Circuits been submitted and approved. *Typical plans of 12 tanks approve*

STEAM ENGINES.— Type of Engine *Steam Turbine* ✓ No. of Engines *one* ✓ R.P.M. *3600/3750* ✓ Is a Governor fitted *yes* ✓ Is the speed variation as per Rule when load is thrown off *—* Is an Emergency Governor fitted *yes* ✓ Does it operate as per Rule *—* ✓

If exhaust steam is admitted, is an automatic shut-off fitted *—* Is provision made for bled steam *no* and is a non-return or positive shut-off valve fitted *—* Lubricating Oil.— State means provided for emergency supply *Gravity Tank*. ✓ Is the emergency reserve sufficient to maintain lubrication as per Rule *yes* ✓ Mechanical Balance.— Are the Engines and Generators balanced so as not to cause appreciable vibration *yes* ✓

OIL ENGINES.— Type of Engines *—* R.P.M. *—* Is a Governor fitted *—* Is the speed variation as per Rule when load is thrown off *—* Is an Emergency Governor fitted *—* Does it operate as per Rule *—* ✓

GENERATORS.— Direct or Alternating Current *A.C.* ✓ No. of Generators *one* ✓ If A.C. state frequency at full load *60/62 cycles*. ✓ Kw. per Generator *4925/5400* ✓ Volts per Generator *2300/2370* ✓ Amps. per Generator *1237/1315* ✓ Have certificates of works tests been supplied *no* and the results found as per Rule *—* ✓ Ventilation.— State how arranged (open or closed system) *Closed system*.

Are ventilating arrangements satisfactory *yes* ✓ Heating when Idle.— What provision is made *Electric heating located within inner shields of generators* ✓ Facilities for Inspection and Repair.— Are these as per Rule *yes* ✓

Are wear-down gauges supplied *no* ✓ Bilges.— Are the arrangements to prevent accumulation of bilge-water under the machines satisfactory *yes* ✓

MOTORS.— S.H.P. per Motor at full power *—* No. of Motors *one* ✓ Single or double unit *Single* ✓ Volts per Motor *2300/2370* ✓ Amps. per Motor *1160* ✓ Have certificates of works tests been supplied *no* and the results found as per Rule *—* ✓ A.C. Motors.— Is provision made for machining the slip rings *no* Do the Motors remain in synchronism under all normal conditions of running *yes* ✓ D.C. Motors.— If the system permits overspeeding at light loads are overspeed protection devices fitted *—* ✓

EXCITATION.— Is power for excitation taken from the ship's Auxiliary Generators *—* See below ✓ If so, state voltage *110* and excitation amperes at full power *100-175* kilowatts for excitation *75* State excitation arrangements for Propulsion Generators *Excitation for both propulsion generators and motors provided by 75kW exciter driven by step auxiliary turbo-set whilst coast of 400kW alternator, and Propelling Motors 75kW Exciter and 55kW DC Generators* Is an alternative means of excitation provided *yes* ✓ Two aux. exc. provided do above. Have certificates of works tests been supplied *no* and found as per Rule *—* ✓

CONTROL.— Position of Main Control Panel *In main engine room at starting platform* Does it comply with the requirements regarding position *yes* ✓, grouping of controls *yes* ✓, instruments *yes* ✓, insulating materials (state type used) *appear to be standard type of synthetic* ✓, spacing and shielding of live parts *yes* ✓, accessibility *yes* ✓, position of fuses *yes* ✓, locking of screws and nuts *yes* ✓, labelling *yes* ✓, fuses for voltmeters, pilot lamps, etc. *yes* ✓, provision for manual operation of contractors, etc. (state method employed) *Contractors manually operated by means of levers & interlocked against incorrect operation.* ✓

earthing of instrument cases above 250 volts to earth *yes* ✓, provision of renewable tips on switches subject to arcing *yes* ✓, capability of withstanding shock and inclination *yes* ✓, operation with high and low voltage *yes* ✓, rust proofing of parts. Overload and Short Circuit Protection.— State means provided *Phase balance relay for protection against phase faults resulting from short circuit between phases or open circuit in one phase. Fault trips excitation breaker.* ✓

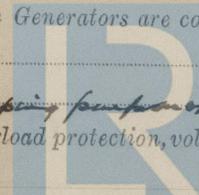

At what load is it set to operate *25% out of balance* Has it been tripped by hand when running at full power and found satisfactory *not tested* ✓

Are fuses of an approved type *All fuses are American Standard Cartridge type.* ✓

Earth Detection.— Is the main circuit provided with means for detecting earths *yes* ✓ Are aural and visual alarms fitted *usual* Is main power interrupted by an earth fault *yes* ✓ If a limiting resistance is in the earth detecting circuit what is the ohmic value *670 ohm* What earth leakage current is necessary to operate the device *max. 2.5 amp* If a switch is used to disconnect the aural signal does it automatically give visual indication *—* Are the excitation circuits provided with means for earth detection *yes* ✓

Mechanical Protection.— Are circuits above 250 volts to earth protected as per Rule *yes* ✓ Bridge or Deck Control.— Is bridge control provided *no* If so, from how many stations *—* can it be operated freely without producing currents or loads in excess of the working capacity of the plant *—* and without reference to electrical instruments *—* Is an emergency control provided in the engine room *—* and can the transfer to this control be made quickly in the engine room *—* Can the emergency control be rendered mechanically independent of the deck control *—* Instruments and Gauges.— State Instruments provided for each Generator *Shunt Field Lamp indicators* *Volts Ammeter, speed indicator, Gen. Volts Ammeter. Phase balance relay. Earth relay.* ✓ and for each Motor *Shunt Indicator, Field Line Volt Ammeter, Resistor Indicator. H.P. meter* Is an Insulation Tester provided *yes* ✓

Discharge Protection.— Are all shunt field circuits protected as per Rule *yes* ✓ D.C. Systems.— If the Generators are connected in series state means provided to prevent reversal of direction of rotation of the Prime Movers *—* Are the Propulsion Generators also used alternatively for other purposes *yes* ✓ If so, is provision made for overload protection, voltage adjustment, etc. *yes* ✓

005367-005376-0083

Reversing Switches.—If any are provided are they interlocked as per Rule Yes Resistances.—Are resistances for synchronous motor fields insulated as per Rule No—Indicator only.

Temperature Alarm.—Are machines with enclosed ventilating system, etc., fitted with temperature alarm Yes Are the ends of Paper and Varnished Cambric Insulated Cables sealed Yes Are all Cables carrying A.C. constructed and installed as per Rule Yes Have all Cables been tested at the makers' works

CONDUCTORS & CABLES.—Are all essential Conductors stranded as per Rule Yes Are the ends of Paper and Varnished Cambric Insulated Cables sealed Yes Are all Cables carrying A.C. constructed and installed as per Rule Yes Have all Cables been tested at the makers' works

SECONDARY BATTERIES.—Are Batteries used for starting Main Propulsion Engines No If so, have full particulars of rating been submitted and approved — Have they been tested under working conditions and do they give the required number of starts — Are they installed as per Rule — Are the charging arrangements satisfactory —

SPARE GEAR.—If engaged on open sea service has a list of spare gear been submitted and approved No Is a list of the articles supplied attached to this report No — Are they stored as per Rule Yes

### ELECTRIC PROPULSION EQUIPMENT CONDUCTORS.

DESCRIPTION	CONDUCTORS.		TOTAL MAXIMUM CURRENT—AMPERES.*			MAXIMUM VOLTAGE TO EARTH.	INSULATED WITH.	DI-ELECTRIC THICKNESS.	HOW PROTECTED.
	No. per Pole.	Nominal Area per Pole. CIR. MILES	In Circuit.	When Running.	When Manoeuvring.				
MAIN GENERATORS	2	3,000,000	1315 ✓			1708	2300	V-C	L.C.A.
GENERATOR FIELDS	1	500,000	165-375 Am.			444	110	"	"
MAIN MOTORS	2	300,000	1160 ✓			1708	2300	"	"
MOTOR FIELDS	1	50,000	400/420			444	110	"	"
CONTROL CIRCUITS									
OTHER CIRCUITS:									

\*For field circuits the "Hot" and "Cold" value should be given.

The foregoing is a correct description,

Electrical Engineers.

Date

COMPASSES.—Are Single-Conductor circuits carrying direct current arranged with lead and return Conductors fitted as close to one another as possible

Have tests been made during adjustment of the Compasses to determine the effect of switching the main circuits on and off

Builders' Signature.

Date

Generally similar to other  
T2 Tanker. If so, state name of vessel "Helman" - "Tribulus", "El. Mono".

Is this machinery duplicate of a previous case

General Remarks (State quality of workmanship, opinions as to class, etc.) The Electrical Propulsion Equipment of this vessel appears to have been installed in accordance with American practice and the typical plans of T2 Tanker. The details in this report were obtained from plans and installation booklets on board & from personal observation. The machinery was examined and tested under working conditions and found satisfactory. The equipment appears to be in good and efficient condition & whilst not strictly in accordance with the Society's Rules, it is, in my opinion, eligible for classification.

The Surveyors are requested not to write on or below the space for Committee's Minute.

The amount of Entry Fee ... £ 40 : 0 : 0  
(Part Classification L.M.C fee)  
Travelling Expenses (if any) £ : : When applied for,  
When received,

19

A. Steffens,  
Surveyor to Lloyd's Register of Shipping.
