

Motorship "PLATANI"

Mr. Glynn has called in regard to our letter of the 15th instant.

He states that owing to the vessel's commitments, no definite arrangements have yet been made for the next drydocking, although this must take place within the next three months.

He therefore requests that further examination of No. 5 DB tank (port side) be deferred until the ship is dry docked at the end of March, 1962.
