

m.s. "SPETSAI PATRIOT"

Refer Apapa Surveyor's  
letter dated 2.1.63.

SUBMITTED the Surveyor  
be informed that his acceptance of the internal  
structure of the fore and aft peak tanks based  
on the tightness of the bulkheads is not  
considered a sufficiently strong reason for  
recommending dispensing with the examination  
of these tanks, particularly in view of the  
ship's age and the instructions contained in  
London letter of the 12th November and these  
points should be borne in mind when dealing  
with future similar cases.

*J.I.*  
8.1.63.
