

suspended for Glasgow
when built Mr. Geo. Fullerton.

In 1932 was reported as having the following dimensions
 $33^{\prime}-0^{\prime\prime}$, bridge $256^{\prime}-6^{\prime\prime}$, Forecastle $33^{\prime}-6^{\prime\prime}$, after well
 $10^{\prime\prime}$ and forward well $34^{\prime}-2^{\prime\prime}$ giving a total of $400^{\prime}-0^{\prime\prime}$
a freeboard length.

Stern has now been fitted and the new length becomes
 ~~$33^{\prime}-0^{\prime\prime} + 6 \frac{1}{2}^{\prime\prime}$~~ increased by $6 \frac{1}{2}^{\prime\prime}$ giving a new length of
 $33^{\prime}-6 \frac{1}{2}^{\prime\prime}$.
~~82' 2.25 ft.~~

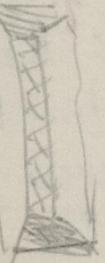

The Surveyor has reported that the fore bulkhead
was altered, the bridge after bulkhead remaining in
original position. The vessel is now reported as having
 $33^{\prime}-9^{\prime\prime}$, bridge $256^{\prime}-6^{\prime\prime}$, Forecastle $33^{\prime}-6^{\prime\prime}$, Forward well $38^{\prime}-3^{\prime\prime}$
well $34^{\prime}-2^{\prime\prime}$ giving a total of $401^{\prime}-1^{\prime\prime}$. At the total of
