

Motor vessel "SKANDINAVIA"

This Norwegian tanker was apparently constructed under the Special Survey of the German Surveyors formerly employed by the Society at Hamburg. A Freeboard Report actually came to hand from Mr. Goering, one of the ship Surveyors there, in December last through the Oslo Office, and Norwegian Freeboard Certificates, valid for five years, have been issued.

She stands class contemplated in the Register Book, but it is concluded that before any class can be assigned, it will be necessary for the scantlings to be verified from the sister ships, by the Society's Surveyors and instructions are desired on this point. It is also concluded the ~~it~~ will not be assigned in this case.
