

"BALTONIA"

Gms. 23140.

In previous cases of ^{Hansa}~~Hausen~~ Type Vessels
modifications have been necessary to water gauge
terminal cocks, blow down valves and scum valves.

Information is now to hand that this vessel
in fact conforms to the Rules in this respect.

IT IS SUBMITTED that the class be subject
to switches being fitted to the lighting circuits on
the main switchboard, but without special conditions
regarding water gauge terminals and the scum and blow
down valves. *Amended 12/6/48.*
