

TRANSLATION OF THE LETTER RECEIVED FROM THE SOCIEDAD ESPAÑOLA DE  
CONSTRUCCION NAVAL, SESTAO, DATED 29TH DECEMBER, 1931.

SHIP NO.38 "CABO SAN AGUSTIN "

With reference to the conversation we held this afternoon  
by telephone we herewith return the classing certificate of  
the M.S. "Cabo San Agustin".

As we have already informed you the tonnage you state in  
the aforementioned certificate is the tonnage that has been  
used for the determination of the subsidies and therefore this  
figure includes the double bottom. The actual tonnage of this  
vessel is represented by that figure less that corresponding to  
the double bottom i.e.

12.589 tons
<u>721</u>
11.868 tons

Therefore we will be much obliged if you will modify  
this certificate and return it as soon as possible.

Yours faithfully,

(Sgd)

Frank W. Benson
