## Lloyd's Register of Shipping,

Ocean Chambers, Lowgate,

Hull, 13th July, 1945.

Dear Sir,

M.V. "MITTELMEER" (ex German)

We beg to inform you that this vessel is now under survey at Immingham for General Examination and it has been observed that many of the switches in the accommodation are of single pole type. To replace these by double pole switches, the wiring of most of the circuits will have to be altered and we should be glad to know if the single pole switches can remain, as the installation is otherwise in good order and after a few minor alterations are made will conform with our requirements.

For information, the wireless Motor alternator is being removed from the centre-castle to the wireless room on the bridge deck.

The Secretary,  
LONDON.
