

UNITED BALTIC CORPORATION LIMITED

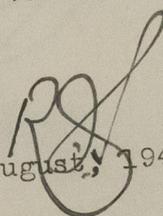

M. S. "BALTABOR".

This vessel stranded off the Latvian coast in February 1939. She was subsequently brought into Liepaja, where she was placed in drydock and temporary repairs were effected to enable her to be towed to the U.K. or Continent for further examination and repairs.

In reply to enquiry the United Baltic Corporation, Ltd., the <sup>Managers</sup> ~~Owners~~, now state that so far as they know the vessel is still at Liepaja and that her British Registry has been closed, seeing that she was declared a C.T.L. on the 2nd May last.

Under normal conditions the casualty record assigned in this case would have been "In port damaged - with date", but as the present conditions of censorship precludes such assignment, it is submitted the case might be dealt with merely by deleting the vessel's Class and Ownership from the Register Book.

30th August, 1940.
