DISCLOSED
SECTION. 135

No. 135

The screw shaft of this trawler became due
for survey in July 1922, and the First Special Survey No. 1
in July 1923.

This case has occupied the attention of the
Classing Committee on several occasions, and on the 16th
ultimo the Cadiz Surveyors were instructed to inform the
Owner that the screwshaft survey must be held without
further delay if the vessel were to retain her class.

A letter was received from the Cadiz
Surveyors in reply, stating that the Owner was unable
to lay the vessel up for the examination of the screw
shaft for about four or five months, and that he desired
that the class should be withdrawn. He also intimated
that he would consider the re-instatement of the vessel's
class when the vessel was drydocked.

In the circumstances, the Classing Committee,
who had the case before them on Tuesday, 11th instant,
decided to expunge the class with a red line (12.23),
indicating non-compliance with the Society's Rules, and
the Owner has been informed accordingly.
