Hull.

Dear Sirs,

We intend building another steam trawler similar in every respect to our S.T. LEANDER, with the exception of boiler being inches longer. As this will increase the heat surface of boiler about 20 sq ft, making a fractional increase in the N.H.P., we ask your permission to vessel with one feed and bilge pump, same as fitted in our S.T. LEANDER. We have written before on this matter but the letter was wrongly addressed.

Yours faithfully,

*E. Bacon*
