In June last the Society's Surveyor at Lisbon stated that all the Portuguese Trawlers employed as mine sweepers had been returned to their Owners by the Portuguese Government, and suggested it would be advisable if letters were sent to the Owners setting forth what was necessary for the Trawlers to remain classed with Lloyd's.

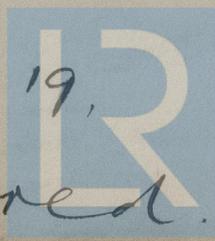

Letters were sent to the Owners as suggested, and in reply to enquiry the Lisbon Surveyor now states :-

With regard to the "RIO VOUGA", "RIO MINHA", "RIO ZEZERE" and "RIO TEJO", the Owners state they cannot tell me anything definite yet as they are trying to sell them and cannot give any answer at present with regard to reclassification."

The 4. 11. 19.

Deferred.
