

COPY. of a letter dated 15th July
received 21st July from The Society's Surveyors at Lisbon,

Sir:

Trawler "RIO TEJO"

I have to acknowledge yours of the 9th July & further to mine of the 13th re. the steamer "RIO TEJO", I have already notified the Owners or rather the Manager & part Owner, to this effect, but as he is no more taken up with politics etc. I have again to suggest for a letter to be addressed from Head Office re. this item & the question of the fees, so that in this way it will come out at a General Meeting. I may further add that this vessel will leave the port before the end of the month & may also state that they are fitting two portable water tanks forward of frame 64 to carry about 11 tons each & will fit or make the ice room between these tanks & 64 frame with a wooden division 4 frames forward of bulkhead, now out, so that the tanks mentioned will really be forward of this wooden division.

I certainly think a letter from Head Office, will have the desired effect, & settle these questions.

I am, ~~Dear~~ Sir,

Your obedient Servant,

(Signed) Geo. Payne.
